## Blue Rolling Plug Door Opener

**Door  
Demon**  
®

Introducing our new **Blue Rolling Plug Door Opener** by Door Demon®. This Plug Door Opener is a stand-alone unit designed to meet your needs where a forklift mounted unit does not fit. This design features safety, mobility, and adjustability in a compact and stable platform. This Door Demon® is small enough to store anywhere yet durable enough to remove the violence and hardship out of opening even the toughest, most damaged plug doors. The spindle head can be manually extended in 6 inch increments (out to 30 inches); however, custom shaft lengths are available upon request.

The **Blue Rolling Plug Door Opener** opens plug doors from a stable platform in a predictable fashion that is non-violent to any worker. By handling stored energy from the recoil in the door's handle in a safe manner, it keeps the operator out of danger from the door. Also, since the unit sits away from the freight car plug door, the operator is not prone to falling (in dock environments).

### Size and Weight Specifications:

- ◆ Platform Size: 30" W x 36" L
- ◆ Maximum Platform Height: 42"
- ◆ Minimum Platform Height: 24"
- ◆ Operating Weight: 680 lbs (est)
