“Quick-Tach” Skid Steer Mounted Hopper Gate Door Opener

The “Quick-Tach” - Skid Steer Mounted Door Demon[®] weighs just under 400 lbs. We use the standard quick attach mounting system. If yours is different from “standard”, we can usually accommodate your situation.

**Door
Demon**[®]

This unit has two pivoting points. The boom itself goes both left and right, then the head also turns left and right. These positions are locked in place with a simple 1” pin. The Demon has a 5-foot reach in all directions so it is past the tires and will clear many obstacles.

The hydraulic hoses hook into your auxiliary line with controls to the driver. The flow controls require 4 gallons per minute. This pressure is obtained by most skid steers and is usually no problem.
